**Technical modification / guide pads catalog number 10-....-410/..**

Dear Sir or Madam,

we would like to inform you about a technical change in the area of unit guide pads as of 01.09.2023. Affected are all guide pads starting with the catalog number 10-....-410/410.. which are installed as components in our tool types 02 / 07 / 07A / 12 / 13 (A/B/E) / 35 (A/B/E/F) / 43 (A/B/E/F) / 62 / 64 / 70 (A/B/E).

The Number of guide pads will be adapted and reduced. Therefore various parts lists are brought up to date across all types. In this context inventories are increased thus guaranteeing even faster availability.

For you there are only changes in the order number. The new guide pads can be used without hesitation in tools already supplied.

Please note that there is a transition period of 6 months for the changeover – the guide pads of the older version can still be ordered but a longer delivery time must be expected.

The new catalogs will be available for download on our website from 01.09. onwards.

Of course we will support you during this changeover.

Do you have any questions regarding the change or do you need support?  
We will be happy to help you. In this case please contact your responsible application engineer or contact us directly and use our technical hotline for this purpose Tel. +49 7123-3808-200.

With best regards

**botek**
