

Single flute gundrills with brazed solid carbide head

Single flute gundrills with brazed solid carbide head

Type 111

Tool diameter 20.000 to 60.000 mm

Advantages:

- Reduced carbide usage (brazed solid carbide cutting insert and guide pads)
- Shorter lead time for new production
- Performance comparable to single flute gundrill with drill head made of a steel body, Type 110 (machining parameters, bore quality, tool life)
- Tool regrinding possible
- Available in both measurable and non-measurable peripheral contours
- Coating options similar to single flute gundrills with brazed solid carbide head

Special tools also available upon request (stepped gundrills, twin fluted drills)
