## Milestones from 1974 until today

## Our vision

We develop and manufacture drilling tools, deep hole drilling tools with Ø 0.5 - 1,000 mm, milling cutters and reaming tools as well as the associated services for our customers. Our goal is to find the most economical solution for each customer and to constantly develop it further. We trust in the competence, commitment and creativity of our employees as well as in innovative advanced technologies to always be one step ahead.

We want to excite our customers.

**Our motto is:** Improve what we do well!

You can find our company guidelines on our website: [www.botek.de](http://www.botek.de)

## Service

- **Regrinding / coating:** botek offers you an individual, fast and cost-effective in-house regrinding service. In order to achieve optimal machining results, we count on tool coatings. We are pleased offering to recoat your tools in connection with our **regrinding service**.
- **Express production:** Tools, that are not included in our **stock program** can be manufactured within **24 h**, provided that all components are in stock or by arrangement.
- **Process design:** Our team of Application Engineers analyses and improves your process in your facility and coordinates all technical details.
- **In-house trials:** Solution of machining problems, feasibility tests, optimization, education and training for your technicians.
