BTA/Ejector Head Setting Gauge

- For measuring exact diametres on Indexable Deep Hole Drilling Tools
- Lowers job costs by setting away from machine
- Saves hours of valuable machine setting time
- Ensures accuracy first time round
- Eliminates trial and error costs

Do you have a problem setting your drill head diameter?

Accuracy measured by Dial Indicator, so eliminating operator error, using a Micrometer with dial indicator.

The Fixture Consists of:

Column and Granite Base
Order Ref: 90-0100-000

Micrometer Dial with Setting Gauge

Ø 1 – 100 mm: Order Ref: 90-0100-100

Ø 100 – 200 mm: Order Ref: 90-0100-200

Setting gauge up to 400 mm also available.
